

1

ABSTRACT

2 The present invention relates to hand operated gardening
3 and landscaping tools for use in cultivating soil and/or
4 removing inferior or unwanted plants from a selected area.
5 More particularly, the present invention relates to a
6 combination scuffling hoe and rake assembly. The combination
7 tool allows an operator to cut unwanted weeds below the
8 ground surface and thereafter groom the weeded area without
9 having to use separate tools to complete the task.
